

Immerse your students in ocean science!

The [your museum] is now taking reservations for the new giant-screen film ***Humpback Whales***, opening February 13. As a complement to the film, we are also offering a new workshop—***Oceanography Learning Lab***—as added value for your field trip experience!

The 45-minute learning lab offers hands-on science activities that will get students excited about science and science content aligned with Next Generation Science Standards for grades 3-8.

LAB TOPICS:

- Animal Structures and Adaptation
- Food Webs and Ecosystems
- Ocean Acidification
- Oceanic Circulation and Currents

Mark your calendars for February XX, 7:00pm for our Teacher Preview night! See the film and get a live demonstration of the learning lab.

Make your field trip reservation now!
